Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 01 September 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Status: *Claims 17-30 are pending.*

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

The special technical feature linking the genera is the generic method that (a) provides a composition comprising a sugar ester; and (b) contacting a substrate selected from the group consisting of skin and hair with the composition. This element cannot be a special technical feature under PCT Rule 13.2 because the element is shown in the prior art.

In the present case, Goode et al teach a cosmetic base composition exhibiting therapeutic properties comprising a sucrose fatty acid ester. The sucrose fatty acid ester is preferably sucrose cocoate (pg. 1, lines 8-22). According to Goode et al, the compositions have utility as skin conditioners and cleansers (pg. 4, lines 4-12). As a result, no special technical features exist among the claims because the inventions fail to make a contribution over the prior art.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The species are as follows:

a.) Species of a sugar fatty acid ester (ie: fructose caprate, glucose stearate, sucrose laurate, etc).

In electing a species of a sugar fatty acid ester, applicant must specify a specific sugar and fatty acid ester portion.

In addition to electing a fatty acid ester, applicant must elect one degree of esterification.

b.) Degree of esterification of a plurality of sugar esters, as disclosed in claims 25-26.

The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: claim 17

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

Comment [11]: but the way they are listed appears like the first choice. Move the species b) so it comes below the newly inserted sentences "In addition to..." so it is not confusing to applicants

Comment [rw2]: yes, that is what I meant.

Comment [13]: is the election between various esters and degree of esterification? or do they have to elect one ester and also one degree of esterification. I guess you meant the second one

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Due to the complicated nature of the restriction, the restriction requirement is being made via written correspondence in lieu of a telephone interview.
